

1. What creates lift for a helicopter?
2. How does a helicopter fly forward?
3. How does a helicopter create drag?

The cyclic controls \_\_\_\_\_, \_\_\_\_\_, \_\_\_\_\_ and \_\_\_\_\_ with helicopter movements.

The collective changes the \_\_\_\_\_ of the blade, which allows the helicopter to move \_\_\_\_\_ and \_\_\_\_\_.

The pedals control \_\_\_\_\_ of the \_\_\_\_\_ of the aircraft which is also known as the \_\_\_\_\_.
