

Table 1

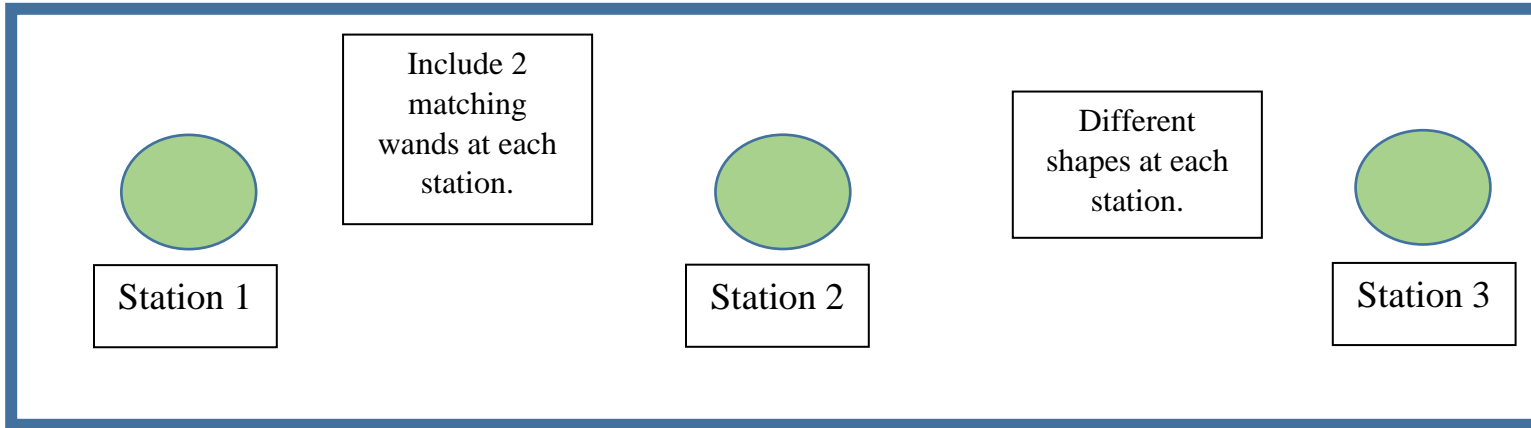

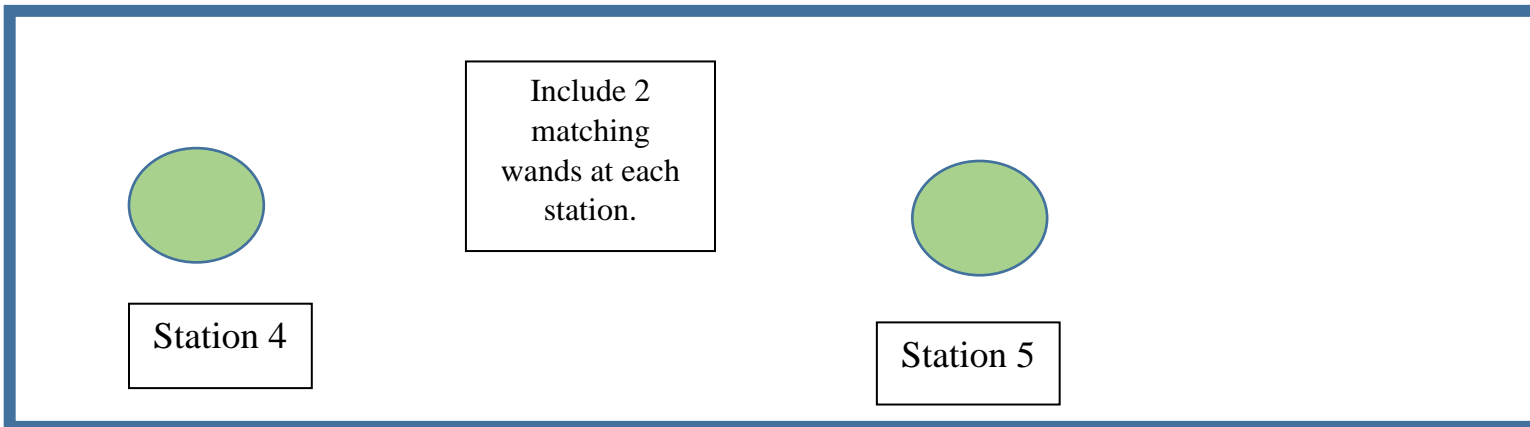

Table 2

- For example
1. Flower Wand
 2. Triangle Wand
 3. Multi-Wand
 4. Star Wand
 5. Square Wand

Create groups of students (3 or 4 to a group would be ideal). Students should travel to each station, when directed, staying with their group.

For example, group 1 would experiment at station 1, group 2 at station 2, and so on. After they have tested that wand, have them sit down and fill out that portion of their worksheet.

When you are ready, and all students are listening, send group 1 to station 2, group 2 to station 3, and so on.

After they have tested that wand, have them sit down and fill out that portion of their worksheet.

Continue rotating stations, until all students have tested each different wand shape.
