

## How to find coordinates on Google Maps on the mobile app

1. Open the Google Maps app on your iPhone or Android phone.
2. Enter the location, or select and hold to drop a pin on the map of the location you want the coordinates for.
3. Scroll down to find the coordinates.

4. Tap the coordinates to copy to your phone's clipboard.

5. Paste the coordinates in the notes section of your phone or write on paper.
