K-12 STEM ENQUIRER

LEGACY Summer Apprentices

LEGACY had apprentices this summer at Wright Patterson, Hill, USAFA, and Eglin. Students participated in virtual and in-person opportunities and group projects. Students were also given the opportunity to participate in Professional Refinement sessions. Some students participated in a partnership with the Institute of Applied Creativity for Transformation (IACT), through the University of Dayton, where they earned micro credentials in collaboration and resilience. Each student presented a final presentation at the conclusion of their apprenticeship. Students were excited to be back on base and it was another successful summer!

- FTC Kickoff
- Classroom Speakers

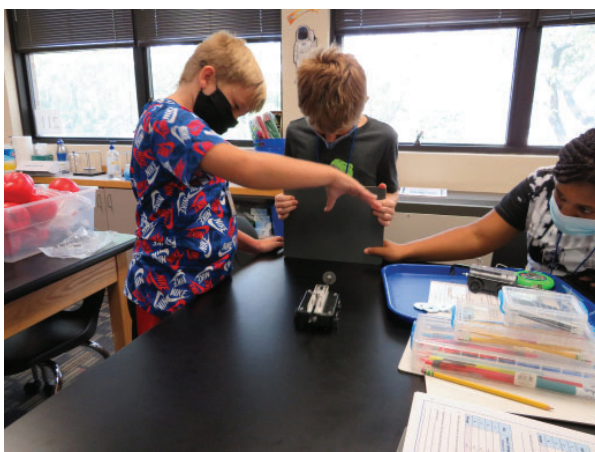

Eglin Apprentices

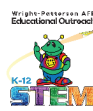

WPAFB Apprentices

Starbase Wright-Patt is starting back to normal operations this month! We are pleased to have students from Monticello and Charles Huber Elementary schools from Huber Heights City Schools and Parkwood and Trebein Elementary students from Beavercreek City Schools masked and ready to explore. Our first hands-on activities will be Newton's Laws and engineering design. We are having fun seeing what these great students can imagine!
